MEREDITH WINS
THRILLING RACE
IN B. Q. GAMES

Penn Runner Captures Police Derby After Bitter Battle with Baker.

Ted Meredith, of the University of Pennsylvania, won a sensational victory in the Police Derby of 600 yards at the indoor games of the Brooklyn-Queens Athletic Association, held at the 13th Regiment Armory, Brooklyn, last night. The Olympic champion won in the last stride, when he overtook the weakening Homer Baker.

Sydney Leslie, of the Long Island Athletic Club, was third, while Richard J. Egan, representing the Irish-American Athletic Club, and the only other starter, was fourth. Joe Higgins, of Holy Cross College, did not compete, as scheduled.

Leslie, challenged for the lead, but he could not down the two leaders, and eventually dropped back unable to hold the pace. Baker and Meredith tore around the track, and with the clang of the final bell, the former still held the lead. However, he began to weaken when half a lap from home, and Meredith, making up two yards in the last forty, succeeded in defeating him by the closest margin seen this season. The time was 1:23.4.

Police Commissioner Arthur Woods and Miss Helen Morgan Hamilton, his fiancée, sat in one of the boxes and seemed to take considerable delight in watching the performance of the policemen athletes.

Jack Eller displayed his versatility by taking half a dozen prizes. In the 75-yard low hurdles event he was clocked in 9 seconds, which equalled his world's record, but, unfortunately, he will not receive credit for the feat, as the hurdles were not of regulation size.

George Mertz defeated Eller from scratch in the 100-yard dash, while George Sherer sent Pat McDonald down to defeat in the shotput.

Hannes Kolehmainen had to be content with second place in the three-mile run, Frank Zuma, an Irish-American clubman, was the victor by some seventy-five yards. The Finn did not seem to have his usual speed during the first two miles, but thereafter he quickly picked up his opponents.

The Trinity Club won the medley relay race as it pleased, principally through the good running of Herman Browner and Frank L. Stephenson.
